### **Qualification & Designation :**

**Qualification :** *B.Arch, M. Tech (Town & Country Planning)*

**Designation :** *Principal*

**Experience :** *20 Years in Profession & Academics.*

#### ***Thoughts on Architecture:***

*“There are 360 degrees, so why stick to one?”*

*.....[Zaha Hadid](#)*

*As rightly quoted by famous Architect Zaha Hadid... Architecture is a powerful synthesis of art, science, technology, and social responsibility. Which once opted take you to 360 degree tour. Architecture goes beyond visual expression. It involves problem-solving, collaboration, and continuous learning. An architect must balance creativity with practicality, innovation with regulation, and ambition with sustainability. The goal is to create spaces that are meaningful, efficient, and enduring.*
